Brain Drain Headhunters
309 Salem St.
Lawrence, MA 01843

Dear Sir,

I believe that I am a good candidate for assistance from your headhunting firm. I am a highly skilled individual looking for a new start.

First, let me begin with my educational background. I graduated from Mentira State University with an undergraduate degree in holistic medicine. Then, I attended Pale University and earned my Master's degree in quantum **physics**.

Following my graduation, I began to look for suitable employment, but I was unable to find anything. Thus, I became an entrepreneur, opening up a first-of-its-kind combination **laundromat/donut shop**. One location expanded to three and eventually I sold the business for several million dollars.

Next, I trained for the 2003 Olympic Games as a competitor in the Individual Synchronized Swimming Event. I was selected for the team, but **did not go to the competition** due to an injury I sustained when I saved a family of seven from their burning home.

Now, after having spent the last few years achieving **enlightenment in a Buddhist monastery in Tibet**, I am ready to move on to the next phase in my life. According to your brochures, your company specializes in finding the right-sized holes for square pegs like me. Ideally, I would like to find a position that combines all of my previous interests: caffeine, wet clothing and soap, colorful swimwear, and meditation.

I have sent a résumé with this letter, which contains a timeline of my career spanning backwards over the past ten years. I hope that you will invite me in for a consultation session after you peruse it. **You recently aided a friend of mine in finding her dream job and I hope you can do the same for me.**

Rayburn Software Park
Recreational Softball League
Meeting Minutes
Date: February 26

The first meeting of the year regarding the new season took place on Tuesday evening.

Roll:

- J. Pitman, Lansing Tech
- H. Terminshire, Gradient Systems
- V. Mason, Macrohard Software
- R. Frupterd, Jones & Co.
- W. Walters, Meehan Circuits

S. Nelson, Putnam Tech (Elected Recording Secretary)

The first order of business was to see how many teams we would be able to field. Vic Mason said that it was unlikely they would have enough interest to field a whole team, so he plans to ask some people from Lexar Disks to join his team. Otherwise, he said that this year, Macrohard would not be joining the league.

Next, Jeb Pitman, treasurer from last year, reviewed the amount of money left in the league's coffers. He stated that there was still approximately \$300 left in the league's account. It was his opinions that dues did not need to be increased this year, and that

they might even be decreased slightly. This will be taken up again at the next meeting.

The third order of business was to set a preliminary schedule. However, due to Macrohard's uncertain participation, this plan was tabled until the number of teams is settled.

The last order of business was to discuss rules changes. It was decided that last year's required mix of 50% men and 50% women would be too difficult to maintain. Thus, it was decided that this year, the league will strive for a 60% to 40% male to female ratio.

The meeting was adjourned to Jacoby's Irish Pub where informal discussions lasted well into the evening hours.

Submitted: February 27

Hillsborough Printing
908 Everfield St.
Boise, ID

April 19

Penney Lutz
Rainbow Colors Sales Director
12 Industrial Parkway
Wenatchee, WA

Dear Ms. Lutz,

Your company, Rainbow Colors, has been our primary specialty ink supplier for close to five years. In the past, we have been satisfied with the quality of the ink we have

received from you. However, we are not as confident in your products as we once were.

Late last year, you announced that you were switching **the formula used to produce your colored inks from one based on petrochemical solvents to a more environmentally friendly formula using flaxseed oil**. At the time, we were skeptical, but you personally came in and convinced me that your product would be as good as ever despite the changes.

Unfortunately, this has not been the case. We have found several serious problems with your flaxseed oil-based ink. First, if the inks are exposed to high heat, they become sticky. **Last week, we were forced to reprint 40 thousand movie posters** because they essentially were sitting in the back of a delivery truck and the inks melted together. After reprinting them, we had to ship them in a refrigerated truck! Needless to say, the incident cost us thousands of dollars.

More serious is the way that your new inks clog the sprayers in our printing equipment. After printing those posters, we had to shut down for almost one full day and clean all of the printing equipment by hand. My workers now refuse to handle any of your new inks.

Unless you can provide us with your original product, we will be forced to purchase our ink from another supplier. Please send someone to pick up your most recent shipment. We are returning it and expect a full refund. Contact me when you receive this so that we can discuss your future as our supplier.

Sincerely,
Jack Cranston

Questions 177-180 refer to the following e-mail.

From: Lily Hu
To: Willa Menendez
Subject: Our secret mission

Hi Willa!
Mission accomplished!

When I got your e-mail last week, I thought that your idea to go in to that newly opened Heavenly Body Spa as a customer was a great idea. It's a great way to keep an eye on the competition. Here's what I found out.

First, Heavenly Body offers a lot of the same services as we do, but they charge on average about 20% more. I went in at first only intending to get some information and ask some questions. But after talking to the receptionist (she was very persuasive in her sales pitch, by the way...I think we need to train our staff a little better!), I decided to purchase a facial exfoliation.

Well, after getting past the receptionist in the lobby, which was decorated really nicely, I discovered that the treatment area is very similar to ours. Although I couldn't be sure, it kinda felt like I was the only customer there. This may be because it just opened or it could be because of the price.

The woman who did my facial was terrible. Her technique was OK but she was curt 草率 and sullen 悶悶不樂的. She didn't want to chat. I felt like she thought I was a poodle 貴賓狗 at a pet grooming 寵物美容 shop. Anyway, the facial itself was OK. Nothing special.

There's more to tell, and I have all of their brochures, so we'll talk more at work tomorrow.

From: Physical Plant Director, Manuel Ortiz
Re: Saving Energy

In light of rising fuel costs, we would like members of the maintenance team who work closest with the operation of our facilities to submit any suggestions they might have with regard to how we might make our building more energy efficient. If your idea is chosen to be implemented, you will be first in line to lead the renovation project.

Please submit your ideas to Vince Walker in Office 867. Your proposal should include a detailed description of the current wasteful situation, your proposal for how to solve it, and your estimate of how much energy will actually be saved. Questions about submissions can be directed to Vince at ext 867.

MEMO to Vince Walker

From: Lou Biggs
Mr. Walker,

I am a new employee. I've only been with the company for about 3 months in the shipping department. However, ever since I started, I've noticed that you lose a lot of heat out of the warehouse when the large doors of the delivery bay are left open. This happens after a truck is loaded or unloaded. It sometimes takes a half hour before someone thinks to close the door. I propose using a motion detector and a timer to automatically close the door after a truck has left the loading dock. For a minimal investment in simple items that can be purchased at a local hardware store, you can save a lot of energy. I'm in the warehouse (EXT 112) if you want to ask me more about this idea.

Lambert Plastics Hires New CEO

According to a press release late Friday afternoon, Lambert Plastics has decided on a new chief executive officer, **Holly Brando**. After an extensive, nation-wide search, Lambert has decided to promote from within, lifting Ms. Brando from her current position as VP of Sales and Marketing to the companies highest leadership position.

Ms. Brando is well known in the world of plastics. She made her name early, not as an executive, **but as a scientist in the labs of the now defunct X-ron Plastics**, heading up the team that developed Plastolase, the world's first disposable plastic laser. After moving into management, she continued to think out of the box by including scientists and technicians in her inner-circle of advisors.

Ms. Brando was unavailable for comment. However, an anonymous source close to Ms. Brando indicated that she was pleased with the announcement. A press conference is scheduled for Tuesday morning at 10 am. It is unclear whether Ms. Brando will appear at the conference or not.
